

H&S COMPLIANCE MANAGER

The Standard in Health & Safety Software

Built-in Health & Safety Library

Integrates with many other systems

H&S Compliance Manager integrates with many payrolls and HR systems

- Visual Personnel Manager
- IMS Payroll Partner
- Comacc Visual
- QSE Total Risk Manager
- Workmate Asset Management

Plus many others!

We believe one of the key factors in safety is employee training. With the H&S Compliance Manager identifying hazards staff are exposed to and training using work instructions, we have reduced incidents and costs. We have been complimented by auditors on our pro-active approach to safety.

—Geof Jackett Safety Consultant - Mico Metals Ltd, Auckland, New Zealand

H&S COMPLIANCE MANAGER

"The Software Framework to Help You Manage Health & Safety"

Reduces health & safety implementation costs

H&S Compliance Manager is implemented with a comprehensive library of policies and procedures, ready for you to modify for your business. Includes codes of practice, industry guides, law, staff manuals, a letter to suppliers and much more. This alone will save you hundreds of dollars.

Reduces compliance costs

The software framework groups requirements and provides a systematic approach for compliance. It includes the procedures and tools you need as well as the "how to." No need for each new manager to "reinvent the wheel." You'll have consistency across departments now and in the future.

Reduces incidents, injury time and other costly waste

Effective health and safety management can minimise unnecessary costs and waste in both human and business terms. The key is firstly to know what causes waste and costs and secondly having effective controls. Hazards are the causes of costs and waste. Effective work instructions and training are the controls. H&S Compliance Manager provides you with the tools you need to help you manage unnecessary incidents and costs.

Increases employee effectiveness and participation

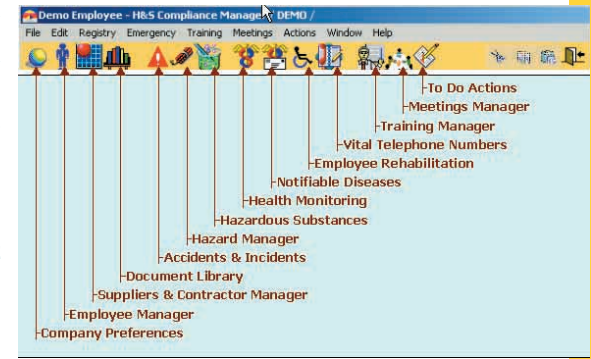

You can delegate areas of responsibility to other managers and employees using the multi-user networked software and overview progress for better management. The built-in multi-level security means you control access to information and allow users access to only what they need. You can monitor and manage H&S meetings more effectively by having participants complete requirements beforehand. Wider employee participation increases the effectiveness and faster adoption of your H&S system.

"The new version of H&S Compliance Manager is very good. The system can be used to track accidents and incidents involving damage to machinery and plant."

—Graeme Diprose - Safety Officer, P&O Ports, Tauranga NZ

H&S Compliance Manager provides you with all the tools you need for more effective management of your health and safety system. Used by businesses of all sizes it is the standard in H&S management everywhere it is used.
